

Final Project: Software Prototype [S:A]

[Start Assignment](#)

- Due No Due Date
- Points 30
- Submitting a website url
- Attempts 0
- Allowed Attempts 5

PROMPT

Congratulations on the work you have done in the previous weeks; kudos :). I hope by now, going through the software development cycle has given you some skills that can be built upon to gain more understanding of how to build software from start to finish.

In this summative, you will submit a self-recorded video clip of a duration of between 5 and 10 minutes. In the video, please make sure to capture the following, among others:

- **The description of the system.**
 - The problem statement
 - Why is it a problem?
 - The proposed solution
- **The Demo**
 - The prototype shall reflect the requirements indicated in the SRS
 - The prototype shall capture the actors and processes indicated in the system design.

SUBMISSION INSTRUCTIONS

Create a Google doc with the name structure: ***personNames_[Summative]_[MMDDYYYY]***

- Paste the link to **your video in the doc**
- Paste the link to your **GitHub code in the doc**
- Make sure the read me in GitHub explains **clearly how to set it up. Every single step one has to follow to get the project running**
- Make sure the GitHub repo is **public**
- Add a link to your SRS document
- **Make sure** your product is **publicly** accessible - have a URL.
- **Make sure all the links are working correctly and your google doc has access granted. Any incorrect links that ends up not working or opening during grading will be graded Zero/0 points.**

Submit the link to the Google doc on Canvas by **28 March 2026.**

Final Prototype Demo

Criteria	Ratings				Pts
Reflections of the system requirements The design/overall look captures the functional requirements without testing whether it is active or not	10 to >8.0 pts Capture all user functionalities, as highlighted in the SRS and system design	8 to >6.0 pts Doesn't capture all user functionalities, as highlighted in the SRS and system design. However, the ones covered are relevant to the project.	6 to >3.0 pts Doesn't capture all system functionalities, as highlighted in the SRS and system design, and most are unrelated	3 to >0 pts Presentation of unrelated system, but with similar features	10 pts
Presentation	5 to >4.0 pts Presenter is audible and clear. Articulates the description of the system.	4 to >3.5 pts Presenter is audible and clear but does not articulate description of the system.	3.5 to >1.4 pts Presenter is not audible and clear. Does not articulate description of the system.	1.4 to >0 pts Presentation was poor. Did not articulate description of the system.	5 pts
Code availability requirements	5 to >4.0 pts Student submitted git hub repo, made it public with clear instructions on how to set it up	4 to >3.0 pts Student submitted git hub repo, made it public with unclear instructions on how to set it up	3 to >1.0 pts Student submitted git hub repo, made it public no instructions on how to set it up and running	1 to >0 pts No repository present	5 pts
Solution Deployment Evaluate whether a public URL or a publicly accessible URL (web address that can be reached from anywhere on the internet) for web-based Non-web-based apps are deployed on relevant	5 to >3.0 pts Deployed Solution Exists	3 to >0.0 pts No deployment solution but there is an alternative solution Web projects - No public URL routable over the internet Mobile apps - No downloadable package and demo video does not show a working prototype		0 pts incomplete solution and no deployment package	5 pts

Criteria	Ratings			Pts
platforms (deployment package exists)				
Operation These functionalities include Login, signup, active/in-active buttons, and page redirections especially as explained within the scope of the implementation.	5 to >2.86 pts Basic functionalities are seamlessly working with minimal issues	2.86 to >1.25 pts Functionalities, as highlighted in the SRS and system design are buggy or not-working The functionalities are not working and not mentioned as a challenge in the submission	1.25 to >0 pts Non-functional Features	5 pts
Total Points: 30
